PROFESSIONAL SUMMARY

Computer Science and Engineering B.Tech student with hands-on experience building and deploying a full-stack warranty-management web application. Familiar with C++, Python, React, Node.js, Express.js, SQL, MongoDB, and Generative AI (GenAI) concepts. Interested in applying software development and AI-assisted problem-solving to practical web applications and REST API development.

TECHNICAL SKILLS

Languages: C++, Python

Frontend: HTML, CSS, React

Backend: Node.js, Express.js, REST APIs

Databases: SQL, MongoDB

AI: Generative AI (GenAI) fundamentals, prompt engineering

Problem Solving: Data Structures and Algorithms (DSA), LeetCode

Tools: Git, GitHub, VS Code

PROJECTS

Warranty Wallet | Full-Stack Warranty Management Application

Tech Stack: React, HTML, CSS, Node.js, Express.js, MongoDB

- Built and deployed a web application to organize product warranties and manage warranty details in one place.
- Implemented warranty record creation and management, with expiry-date tracking.
- Developed a responsive user interface and backend API using React, Node.js, and Express.js.

EDUCATION

Chaitanya Deemed to be University — B.Tech, Computer Science and Engineering

SGPA: 9.76 (Semesters 1 & 2) | Duration: Add start and expected graduation years

Sri Chaitanya Junior College — Intermediate | 95.10%

Sri Chaitanya School — Class 10 | 94.33%

ADDITIONAL INFORMATION

Technical practice: LeetCode problem-solving.
